Rairangpur, Odisha | +91 7815087657 | kpranjalllll744@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE SUMMARY

B.Sc. Computer Science graduate with 6 months of freelance data research experience and currently working as an AI Web Developer Intern. Experienced in website, LinkedIn, and business research across thousands of profiles, requiring analytical thinking and decision-making in ambiguous cases. Skilled in Python (Pandas, NumPy, Scikit-learn), with developing skills in SQL and data visualization. Seeking an entry-level Data Analyst role to solve real-world data and business problems.

EDUCATION

Government Autonomous College, Rourkela

2022-2025

Bachelor of Science (B.Sc), Computer Science

CGPA: 7.7/10 (Core: 8.4/10)

PROFESSIONAL EXPERIENCE

AI Web Developer Intern

Oct 2026 – Present

InAmigos Foundation, Remote

- Developing and publishing a personal profile website using AI-assisted web development tools, while reviewing and refining the output to improve design, responsiveness, usability, and overall presentation.
- Analyzing the foundation's website to identify potential improvements in UI design, content, layout, and user experience, using annotated screenshots and structured recommendations.
- Applying web development tools to assigned tasks, evaluating outputs, making implementation decisions, and strengthening practical web development and problem-solving skills.

Freelance Data Research & Virtual Assistant

Dec 2025 – Jun 2026

AdzMantra, Remote | [Certificate](#)

- Conducted detailed website and LinkedIn profile analysis across thousands of profiles to evaluate coaches, executives, and business professionals based on predefined qualification criteria.
- Performed lead research, audience classification, and outreach verification by analyzing services, target audiences, booking systems, and social media presence.
- Managed large-scale data evaluation, applying critical thinking in ambiguous cases while supporting outreach operations through spreadsheets, email extraction, and lead qualification.

PROJECTS

Olist E-Commerce Analytics | [GitHub](#)

Oct 2026 – Present

- Developing an end-to-end analytics project using the Olist Brazilian E-Commerce Public Dataset to analyze revenue, customer retention, delivery performance, and customer satisfaction, with the goal of translating findings into actionable business recommendations.
- Completed data exploration across 9 related datasets using Python and Pandas, evaluating data quality, relationships, key uniqueness, missing values, duplicates, and join issues.
- Currently preparing the data for SQL and Power BI analysis, with planned cohort retention, RFM analysis, statistical testing, and seller-performance analysis.

Movie Recommendation System | [Live Demo](#)

Aug 2025

- Built and deployed a content-based movie recommender (Python, Streamlit) that vectorizes movie metadata (genres, cast, crew, keywords) and uses cosine similarity to recommend the top 5 closest matches from ~4,800 titles, live on the web.
- Integrated the TMDB API for poster fetching, shipped a Netflix-style UI, and kept deployment lightweight by hosting large .pkl model files on Google Drive.

SKILLS

Technical Skills: Python, SQL, Power BI (Learning), Pandas, NumPy, Data Analysis, Data Cleaning, Data Visualization, Matplotlib, Seaborn, Scikit-learn, Excel, Git, GitHub

Languages: English, Hindi, Odia
